

# Core Values

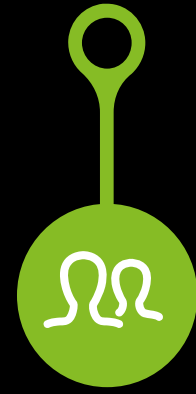

Excellence

Trust & Collaboration

Innovation

Customer-Centricity

Environment & Safety

## Our Purpose

“TPDC empower progress and enrich lives”

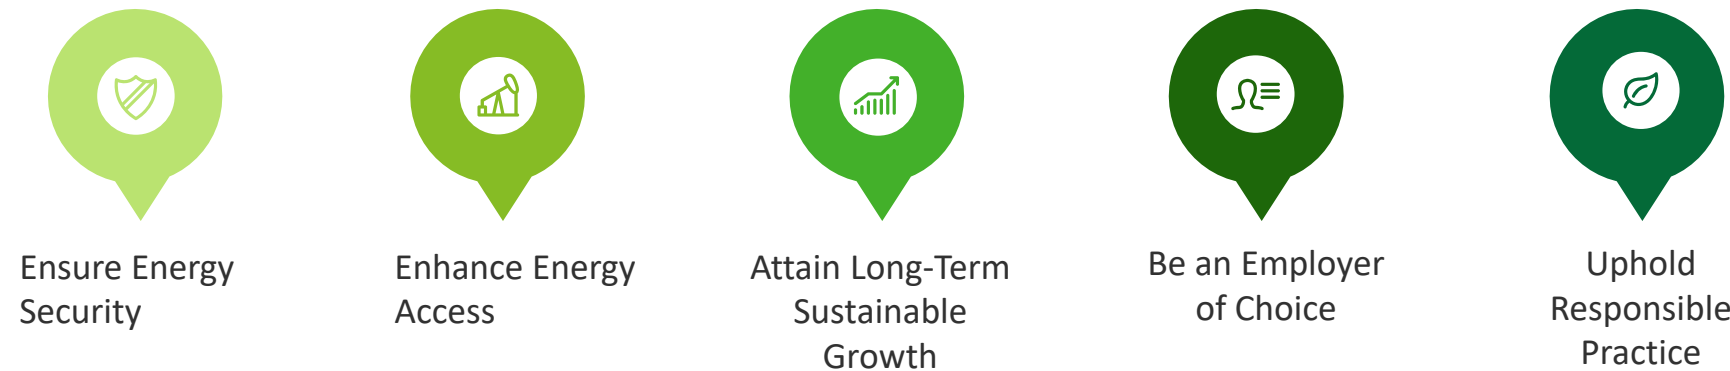

### Our Vision

A Sustainable regional company for affordable, reliable and Innovative sources of energy with a global footprint

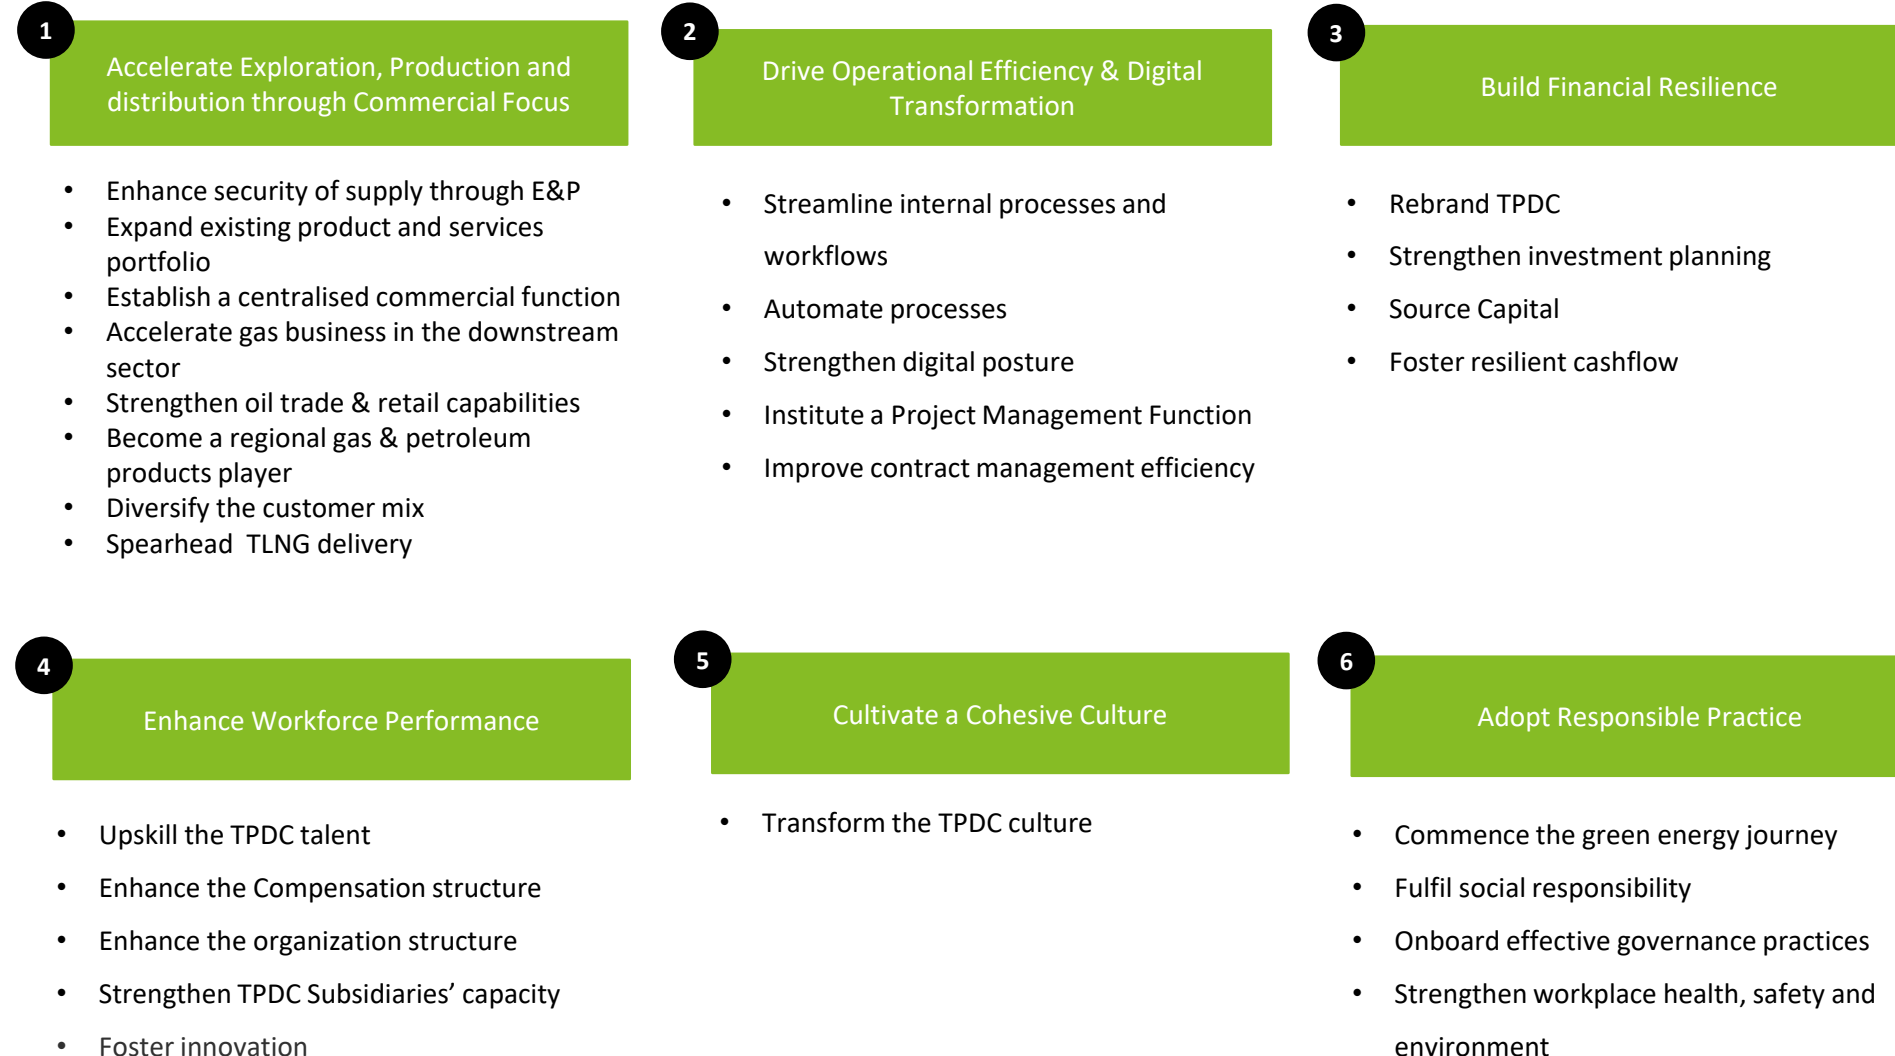

### Our Mission

To ensure energy security and access through efficient exploration, production, processing and distribution of affordable and sustainable energy solutions to customers

### Strategic Goals

### Strategic Objectives

## Where to Play

### Horizon 1 2024-2034

#### 1. Products & Services

- Become an E&P operator of the minor field
- Build and operate LNG terminal
- Establish LPG import and storage terminal and marketing
- Develop gas distribution network including CNG
- Operate Strategic Petroleum Reserve (SPR)
- Set up mini-LNG plant
- Initiate activities for lubricant blending and marketing; construct a cross border gas pipeline for export to the neighbouring countries; construct a gas-based fertilizer plant
- Initiate pilot activities in renewables

### Horizon 2 2035-2040

- Continue operation of LNG terminal, SPR, and gas distribution network
- Set up and operate lubricant blending plant
- Set up and operate cross boarder gas pipeline
- Set up and operate gas-based fertiliser plant
- Set up a trading desk for natural gas and petroleum products
- Scale up renewable energy activities/operations

### Horizon 3 2041 - 2050

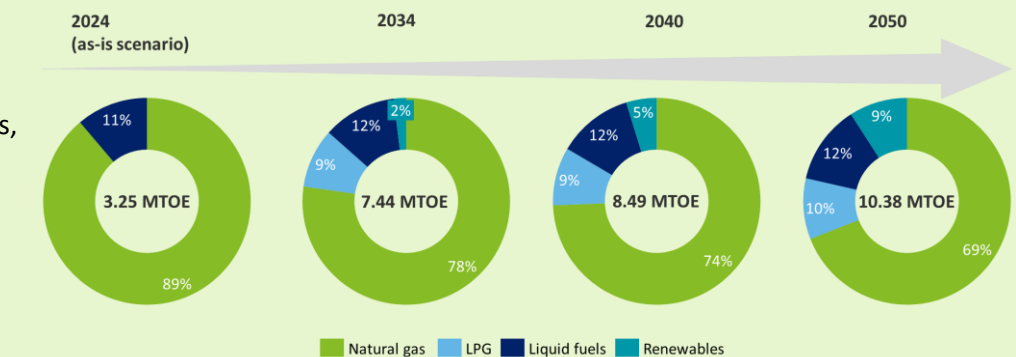

- Continue activities initiated in Horizon 1 and Horizon 2
- Execute initiatives such as ethanol production, distributed power through fuel cells, blue hydrogen, green hydrogen, and EV charging points through pilot projects

#### 2. Geographies

- Emerge as a leading national player
- Achieve LPG penetration across Tanzania
- Set up SPR for national storage and neighbouring countries
- Emerge as an East African player through cross border gas pipeline
- Continue to develop presence in East Africa and Africa
- Establish presence in national renewable energy market
- Participate in global LNG market
- Participate in global oil and gas trading market
- Test national, regional and global market for green hydrogen market by leveraging captive renewable power generation

#### 3. Energy Mix

While the energy mix will be **dominated by the natural gas**, the share of LPG, liquid fuels, and renewables in the energy mix will rise due to the growing access to clean cooking, population growth, and capacity addition in renewables.

#### 4. Customer mix

While the current customer mix is **dominated by the power sector**, it will evolve with the initiatives undertaken which will increase the share of industrial, commercial, transportation and household sectors in the customer mix.
